1. Background

On 20-21 November 2019, Dubai hosted the Global Forum on Innovations for Marginal Environments ([GFIME](#)), bringing together more than 300 delegates from about 48 countries to showcase the latest advances in research, innovation, development and policy in agriculture and food production in marginal environments — areas of the world that are most vulnerable to climate change, water scarcity and salinity. The forum was organized by the International Center for Biosaline Agriculture (ICBA) in collaboration with the Food Security Office and the Advanced Sciences Office of the UAE Government, the Islamic Development Bank (IsDB), the Environment Agency – Abu Dhabi (EAD), and the Khalifa International Award for Date Palm and Agricultural Innovation. Among other partners, the event was supported by the OCP Group. A media campaign was carried out to build public awareness for this event and ensure necessary publicity. A total of 4 press releases were issued and hashtag [#GFIME](#) was created. Several international, regional and national media outlets, as well as TV channels, reported on the event. Below is a summary of media coverage of the event.

euronews.

Climate-change-resistant agriculture

Dubbed as the Food Security and Innovation Day, the forum featured high-level panel discussions involving ministers, policymakers and innovators from around the world.

The UAE, with its harsh climate and adverse crop growing conditions that include low annual levels of rainfall, poor soil quality and shrinking groundwater levels, is well placed to take a lead in advancing technology-enabled

هل تعلم أن أكثر من 70 % من أفراد الناس في العالم يعيشون في "بيات هاشمية"؟
كيف يمكننا استخدام هذه البيئات لزيادة الطعام وتحسين الدخل لآهؤه الناس؟
هذه هي التحديات التي تم حلها في منتدى العالمى للابتكارات للبيئات الهاشمية، وهو أكبر من 300 حبر وضابع قرار من 70 دولة.

Glad to participate at the @ICBAAGriculture Forum, in Dubai.
Food we need already exists, but most people don't have the money to buy it and they don't have the land to cultivate it.
And in some areas, they don't apply innovative technologies to increase their food production.

 UAE Forsan English @UAE_Forsan · Nov 3
The Global Forum on Innovations for Marginal Environments (GFIME) kicks off on 20-21 November #GFIME

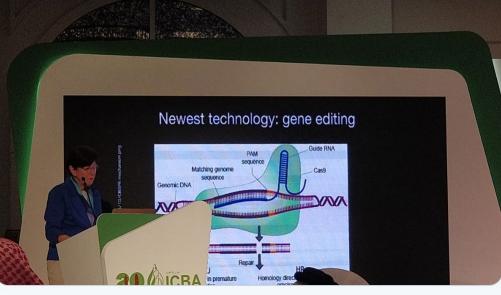

- ▶ Dubai is set to host the Global Forum on Innovations for Marginal Environments (GFIME) on 20-21 November
- ▶ The event is a global showcase for the latest advances in research, innovation, development and policy in agriculture and food production in marginal environments - areas of the world most vulnerable to climate change, water scarcity and salinity
